Control Panel

- Auto Module Control Panel, usually adopt control module of UK Deepsea DSE 6020 or Equal, is the configuration for nobody on duty generators control, This kind of panel adopts auto module control system, with large LCD display to show the menu.
- Features: receive remote output signal from ATS and realize auto start and stop of generators.
- Auto Mains Failure controller, can realize further more can detect ATS and control directly.

- Automatic Parallel Control Panel usually adopting intelligent control module of UK Deepsea DSE8610 or equal, this new automatic parallel system is inserted and folded installed, no need the peripheral relay and logic circuit. The main switch adopts electronic breaker or frame breaker, combined together with the generator, which is very reliable. One generator, one panel. The panel can be used both for single genset working or Gensets Parallel working. This kind of panel also can be used to parallel generator when the capability of the power plant needs to be enlarged in the future.
